

# **Strategic Export Controls**

**Quarterly report**

**January – March 2004**

This is the first in the new series of quarterly reports on strategic export controls to be published by Her Majesty's Government. This report covers the period 1 January-31 March 2004. The data within this report will be between 3 and 6 months old (compared with between 6 and 18 months as in previous Annual Reports), thus further increasing the openness and transparency of the Government's export licensing system.

The information within this quarterly report covers those licences Issued, Refused or Revoked within the period for the following categories:

- Standard Individual Export Licences (SIELs) (including information on incorporation and transshipment licences)
- Open individual Export Licences (OIELs)

The new controls under the Export Control Act 2002 completed their coming into force on 1 May 2004 and statistics on the decisions made under these controls will therefore be reflected in the next quarterly report.

Annual reporting will continue and it is anticipated that we will publish the next Annual Report by the second quarter of 2005. This will summarise the information already published in the quarterly reports, as well as describing export control policy developments. The quarterly data will also be enclosed with the Annual Report.

## **General Information**

### **SIELs**

SIELs allow shipments of specified items to a specified consignee up to the quantity specified by the licence. Licences permitting permanent export

in the main are valid for 2 years from date of issue. Where the export is temporary, for example for the purposes of demonstration, trial or evaluation, the licence is generally valid for one year only and the items must be returned before the licence expires. A licence is not required for the majority of transshipments through the UK en route from one country to another, providing certain conditions are met. Most other transshipments can be made under one of the Open General Transshipment Licences, provided in all cases that the relevant conditions are met. Where this is not the case, a Standard Individual Transshipment Licence (SITL) is required.

The information on SIELs included in this Report has been compiled using the Export Control Organisation's computer databases. The databases were interrogated during the compilation of this Report to identify the status of all applications on which a decision was taken during the period covered by this Report. In a small number of cases there may be a subsequent change of status. There are two main reasons for such changes: a licence issued during the period may have been revoked, for example because of the imposition of trade sanctions or an arms embargo; or a decision during the period to refuse a licence might be overturned as a result of successful appeal. Where an entry is not followed by "(x licences)", then only 1 licence was issued for that Summary.

During the period, 1637 SIELs were issued, 51 were refused and 1 was revoked. There were no successful appeals during this reporting period for licences refused during this period.

## OIELs

OIELs are specific to an individual exporter and cover multiple shipments of specified items to specified destinations and/or, in some cases, specified consignees. OIELs covering the export of items entered on the Military List are generally valid for two years, while OIELs covering other items are generally valid for three years. There are no OIELs for transshipments. During this reporting period 110 OIELs were issued. In addition, no OIELs were amended during the period to exclude particular destinations and/or items, 1 application for an OIEL was refused in full and no OIELs were revoked.

It should be noted that the refusal of an application for an OIEL, amendment to exclude particular destinations and/or items, or the revocation of an OIEL, does not prevent a company from applying for a SIEL covering some or all of the items concerned to specified consignees in the relevant destinations. Clearly, however, the factors that led to the original decision would be taken into account in the decision on any such application.

A summary description is provided for all items covered by licences issued for this period. The Report also gives information on the number of small arms covered by SIELs issued in the period.

However, this information is not provided in cases where, under the Code of Practice on Access to Government Information, the arguments for publication of the information are otherwise outweighed by the harm that this would cause to commercial confidentiality and/or legitimate security interests in the

recipient country. No such exclusions were made in this Report.

In the case of SIELs refused or revoked, only the rating of the goods is provided. Likewise for OIELs, only details of ratings are provided for licences revoked, refused in full or whose coverage was amended during the period by the exclusion of the destination (including items excluded in 2004 by the amendment of 2004 and pre-2004 licences).

## INFORMATION ON SIELs, SITLS AND OIELs contained in this report.

The entry for each destination contains the following information:

*For SIELs:*

- Total value of all applications in respect of which a SIEL was issued for the export of items to the destination concerned during the period, whether the export concerned was permanent or temporary. The total value of SIELs is shown as £100,000 or lower, £250,000 and for larger amounts is rounded to the nearest £500,000. The lower level of less than £100,000 has been introduced as a result of moving to quarterly reporting, and reflects the fact that for some destinations the value of SIELs issued is quite low. (In some cases the value may be well below £100,000)

It should be noted that the actual value of exports made under the licences is likely to be less than shown because some of these licences will not be used to make all of the exports authorised and others will not be used at all. In addition, some items are exported only temporarily and are later returned to the UK.

- The number of licences issued, including numbers of licences for items on the Military List, for other items and for both.

- A summary description of the items covered by the licences issued during the period, with the items that were allowed for temporary export indicated by a "T" preceding the description. The data on refused SIEL applications does not include those refused during this period following an appeal against an earlier refusal. It does include applications refused during this period that, at the end of it, were pending a decision on an appeal. The SIELs data also does not include goods that were removed from an application before a licence was issued, applications withdrawn or stopped before a decision was reached, or applications where it was determined that no licence was required or that the goods could be exported to the destination concerned under an Open General Export Licence (OGEL).

In a small number of cases SIELs may be issued identifying more than one destination. This normally arises where a licence is issued for the temporary export of items for exhibition or demonstration in more than one destination. Details of these licences are included in the information for each relevant destination. This means that the total number of SIELs issued, as shown above, is slightly lower than the sum of all SIELs issued shown on the destination pages.

*For Incorporation:*

Information on incorporation is provided in the same format as for SIELs, and includes the same level of information.

*For SITLs:*

Information on SITLs is provided in the same format as for SIELs. However, the items covered by issued SITLs merely pass through the UK and it would therefore be misleading to include a 'value' for these licences in the report.

*For OIELs:*

- The number of licences issued also includes additional items authorised in 2004 through amendment to a pre-2004 licence.

- A summary description of the items covered by the relevant OIELs issued during the period is shown by destination, with the items that were allowed for temporary export indicated by a "T" preceding the description.

- Information is also provided on the relevant destination pages for OIEL applications refused in full or for licences which were revoked or where coverage was amended during the period by the exclusion of the destination or by the exclusion of items in this quarter by amendment to licences issued in 2004 or earlier.

The destination coverage of an OIEL may be amended for a variety of reasons, but mainly in the light of recommendations received from advisory departments. Sometimes amendments follow the imposition of an arms embargo, but they may also reflect general concerns about the destination or a relevant change in circumstances there. A decision to exclude a particular country from the coverage of an OIEL does not mean that country is permanently excluded. Where the concerns that led to the original decision are no longer relevant, it might be decided to reinstate that destination.

The OIELs data does not cover applications from which specific items or destinations were removed before an OIEL was issued, or applications withdrawn before a decision was reached, or those for which it was determined that no licence was required or that the items could be exported to the destination concerned under an OGEL.

The information does not cover OIELs whose period of validity was extended temporarily during the period pending a decision on an application for a new OIEL. Such cases amount to a temporary extension of an OIEL granted in an earlier period. The decision on the new application will be covered in this or a future report, as the case may be. As OIELs cover multiple shipments of specified goods to specified destinations or specified consignees, exporters holding OIELs are not asked to provide details of the value of goods they propose to ship under an OIEL and it is therefore not possible to provide information on the total value of OIELs issued.

### *Special OIELs*

There are three special categories of OIELs:

#### *Media OIELs*

Media OIELs authorise the export of protective clothing and equipment, mainly for the protection of aid agency workers and journalists, for example when working in areas of conflict. They are valid for two years, and cover the

export to all destinations of items such as military helmets, body armour, bullet-proof or bullet-resistant clothing, flak suits and specially designed components for any of these goods. Goods exported under a Media OIEL must be returned to the UK when they are no longer required for personal protection. During this reporting period, no Media OIELs were issued.

### *Continental Shelf OIELs*

Continental Shelf OIELs authorise the export of controlled goods to the UK sector of the Continental Shelf for the use only on, or in connection with, offshore installation and associated vessels. During this reporting period, 2 Continental Shelf OIELs were issued.

### *Global Project Licences*

This is a form of export licence that has been introduced by Framework Agreement (FA) partners (UK, France, Italy, Sweden, Spain and Germany) to streamline the arrangements for licensing military goods and technologies between them, where these transfers relate to their participation in specific collaborative defence projects. In relation to the collaborative project, each Partner state will, as appropriate, issue their own GPLs to permit transfers of specified goods and technology where these are required for that programme. The GPLs operate on a similar basis to UK Open Individual Export Licences. In the UK, applications for GPLs are assessed against the Consolidated Criteria. No GPLs were issued in this reporting period.

# Dealer to Dealer (Dealer) Open Individual Export Licences (OIEL's)

Dealer OIELs authorise UK registered firearms dealers to export certain categories of firearms and ammunition solely to other registered firearms dealers in the European Union only, provided that copies of valid documentation are forwarded to the Export Control Organisation at least 2 working days before each shipment.

The following is a list of the items that have been authorised for export to the following destinations only:

Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden

No of licences Issued	Goods Summary
3	air guns, deactivated weapons, pistols, replica vintage guns, replica weapons, revolvers, rifles, semi-automatic pistols, shotguns, sporting pistols, sporting rifles, veterinary/tranquillising rifles, vintage guns, vintage shotguns, components for air guns, components for deactivated weapons, components for pistols, components for replica vintage guns, components for replica weapons, components for revolvers, components for rifles, components for semi-automatic pistols, components for shotguns, components for sporting pistols, components for sporting rifles, components for veterinary/tranquillising rifles, components for vintage guns, components for vintage shotguns, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, weapon sights
3	air guns, deactivated weapons, replica vintage guns, replica weapons, rifles, shotguns, sporting rifles, veterinary/tranquilising rifles, vintage guns, vintage shotguns, components for air guns, components for deactivated weapons, components for replica vintage guns, components for replica weapons, components for rifles, components for shotguns, components for sporting rifles, components for veterinary/tranquilising rifles, components for vintage guns, components for vintage shotguns, components for weapon sights, ammunition for veterinary/tranquillising rifles, blank ammunition, crowd control ammunition, inert ammunition, small arms ammunition, smoke ammunition, sporting gun ammunition, training ammunition, weapon sights

#### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £100,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	0
Other items	1
Military List and other items	0
Total number of SIELs issued	1

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

improvised explosive device jamming equipment

## Ecuador

#### STANDARD INDIVIDUAL EXPORT LICENCES

None

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by reinstatement of this destination.		
No.	Type	Goods Summary
1	P	chemicals used for pharmaceutical production
2	P	components for ground based radars.
3	P	equipment for the use of military aero-engines, military aero-engines, components for military aero-engines, military aircraft ground equipment, technology for the use of military aero-engines.

## Egypt

#### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 4.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	9
Other items	4
Military List and other items	0
Total number of SIELs issued	13

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

bathymetric survey systems  
castings for weapon night sights  
components for ground based radars

- components for military communications equipment
- components for tank simulators
- digital computers
- forgings for armoured fighting vehicles
- inertial equipment
- T military infrared/thermal imaging equipment
- military trailers
- military utility vehicles
- T night vision goggles
- precision positioning tables
- semi-automatic pistols (1)
- submachine guns (1)
- submersible vehicles
- technology for the use of military trailers
- technology for the use of military utility vehicles
- technology for the use of test equipment for weapon fire simulation equipment
- technology for the use of weapon fire simulation equipment
- training small arms ammunition
- T weapon night sights
- T weapon sight mounts

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by reinstatement of this destination.		
No.	Type	Goods Summary
1	P	sporting gun ammunition
2	P	improvised explosive device detection equipment, components for improvised explosive device detection equipment.
3	P	electronic warfare equipment, components for electronic warfare equipment, software for the use of electronic warfare equipment, technology for the use of electronic warfare equipment, test equipment for electronic warfare equipment, equipment for the use of electronic warfare equipment, components for imaging countermeasures equipment
4	P	components for electronic warfare equipment, equipment for the use of electronic warfare equipment, test equipment for electronic warfare equipment, software for the use of electronic warfare equipment, technology for the use of electronic warfare equipment,
5	P	command communications control and intelligence software
6	P	components for artillery fire location equipment, equipment for the use of artillery fire location equipment, software for the use of artillery fire location equipment, technology for the use of artillery fire location equipment, test equipment for artillery fire location equipment.
7	T	naval navigation equipment

## Estonia

#### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £100,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	2
Other items	3
Military List and other items	1
Total number of SIELs issued	6

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- components for military communications equipment
- T cryptographic software
- direct view imaging equipment

- T equipment employing cryptography
- T equipment employing cryptography
- equipment for the use of military communications equipment
- military communications equipment
- T remote ground sensor systems

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by reinstatement of this destination.		
No.	Type	Goods Summary
1	P	command communications control and intelligence software
2	P	body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields

## Footnote

The export to Iraq of any goods, unless under the authority of an export licence, was prohibited by the Export of Goods (Control) (Iraq and Kuwait Sanctions) Order [S.I. 1990/1640] until 14 June 2003. General trade sanctions against Iraq were revoked by UN Security Council resolution 1483 (22 May 2003), implemented in UK legislation on 14 June 2003 by the Iraq (United Nations Sanctions) Order 2003 [S.I. 2003/1519]. The embargo on arms and related materiel was retained, with exemptions. The above licences have been included in this report because the goods concerned are controlled to all destinations under Part I and Part III of Schedule 1 to the Export of Goods (Control) Order 1994, as amended or the Dual Use Items (Export Control) Regulations 2000.

In all cases, exports fell within the exemption to the arms embargo imposed by UN Security Council resolution 1483 (22 May 2003), because they were required by the Coalition Provisional Authority to serve the purpose of resolution 1483 and other related resolutions.

- components for airborne electronic warfare equipment
- components for aircraft radars (2 licences)
- components for combat helicopters
- components for military aero-engines
- components for military infrared/thermal imaging equipment
- components for military utility helicopters
- components for torpedoes
- components for torpedoes launching equipment
- technology for the production of military combat helicopters (2 licences)
- technology for the use of castings for combat helicopters (2 licences)

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by reinstatement of this destination.		
No.	Type	Goods Summary
1	P	components for combat aircraft, components for military aero-engines, equipment for the use of military aero-engines.
2	P	military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment.
3	T	military electronic equipment, components for military electronic equipment, equipment for the

		use of military electronic equipment.
4	P	sporting gun ammunition
5	P	components for military utility helicopters, components for combat helicopters, components for combat aircraft, components for military transport aircraft, components for surface to air missiles.
6	P	improvised explosive device detection equipment, components for improvised explosive device detection equipment.
7	P	military flying helmets, aircrew protective masks, components for aircrew protective masks, components for military flying helmets.
8	P	improvised explosive device jamming equipment
9	P	components for ground based radars.
10	P	command communications control and intelligence software
11	P	general military vehicle components, technology for the use of general military vehicle components.
12	P	command communications control and intelligence software
13	P	chemical agent detection equipment, components for chemical agent detection equipment, software for the use of chemical agent detection equipment, technology for the use of chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment.
14	P	components for body armour
15	P	technology for the development of air defence systems
16	P	military aircraft navigation equipment, components for military utility helicopters, software for the use of components for military utility helicopters, software for the use of military aircraft navigation equipment, technology for the use of components for military utility helicopters, technology for the use of military aircraft navigation equipment, test equipment for components for military utility helicopters, test equipment for military aircraft navigation equipment, components for military transport aircraft, software for the use of components for military transport aircraft, technology for the use of components for military transport aircraft, test equipment for components for military transport aircraft, components for military training aircraft, software for the use components for military training aircraft, technology for the use of components for military training aircraft, test equipment for components for military training aircraft, components for combat aircraft, software for the use of components for combat aircraft, technology for the use of components for combat aircraft, test equipment for components for combat aircraft, test equipment for the use of military aircraft airborne navigation equipment, components for combat helicopters, software for the use of components for combat helicopters, technology for the use of components for combat helicopters, test equipment for components for combat helicopters, test equipment for the use of military aircraft airborne navigation equipment, airborne navigation equipment, components for unmanned air vehicles, software for the use of components for unmanned air vehicles, software for the use of airborne navigation equipment, technology for the use of components for unmanned air vehicles, technology for the use of airborne navigation equipment, test equipment for components for unmanned air vehicles, test equipment for airborne navigation equipment, components for tanker aircraft, software for the use of components for tanker aircraft, software for the use of military aircraft navigation equipment, technology for the use of components for tanker aircraft, technology for the use of military aircraft navigation equipment, test equipment for components for tanker aircraft, components for military search and rescue aircraft, software for the use of components military search and rescue aircraft, technology for the use of components for military search and rescue aircraft, test equipment for components for military search and rescue aircraft, airborne navigation equipment, components for military surveillance aircraft, software for the use of components for military surveillance aircraft, software for the use of airborne navigation equipment, software for the use of military navigation equipment, technology for the use components for military surveillance aircraft, technology for the use of airborne navigation equipment, technology for the use of military aircraft navigation equipment, test equipment for components for military surveillance aircraft, test equipment for airborne navigation equipment.
17	P	equipment for the use of military aero-engines, military aero-engines, components for military aero-engines, military aircraft ground equipment, technology for the use of military aero-engines.
18	P	body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.
19	T	naval navigation equipment

### STANDARD INDIVIDUAL EXPORT LICENCES

None

### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by reinstatement of this destination.		
No.	Type	Goods Summary
1	P	chemicals used for pharmaceutical production
2	P	technology for the production of toxins
3	P	body armour, components for body armour, bomb suits, military helmets, anti-riot shields, ballistic shields.

## Japan

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 49.5m
---	---------

Number of SIELs issued covering:	
Items on the Military List	26
Other items	7
Military List and other items	0
Total number of SIELs issued	33

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- ballistic test equipment
- body armour (2 licences)
- chemical agent detection equipment
- components for aircraft radars (2 licences)
- components for ballistic test equipment
- components for body armour (2 licences)
- components for chemical agent detection equipment
- components for combat aircraft (3 licences)
- components for combat helicopters
- components for fire control equipment
- components for military communications equipment
- components for military search and rescue aircraft (7 licences)
- components for mortars
- components for pistols
- components for rifles
- components for sporting rifles
- components for surface to air missiles control/launching equipment
- cryptographic software
- enriched uranium
- equipment for the use of ballistic test equipment
- equipment for the use of fire control equipment
- fire control equipment
- T improvised explosive device disposal equipment
- materials containing enriched uranium (3 licences)

military aircraft ground equipment  
 NBC clothing  
 NBC filters  
 NBC respirators  
 production equipment for small arms ammunition  
 pyrotechnics/fuels and related substances  
 solid state lasers  
 technology for the production of cryptographic software  
 technology for the use of ballistic test equipment  
 technology for the use of fire control equipment  
 weapon cleaning equipment

#### STANDARD INDIVIDUAL EXPORT LICENCES - INCORPORATION

Total value of SIEL applications for which a licence was issued	Less than £100,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
Total number of SIELs issued	1

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

components for airborne radars

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by reinstatement of this destination.		
No.	Type	Goods Summary
1	P	naval sonar equipment, components for naval sonar equipment, software for the use of naval sonar equipment, technology for the use of naval sonar equipment, test equipment for naval sonar equipment, equipment for the use of naval sonar equipment.
2	P	technology for the use of nuclear reactor fuel element fabrication equipment, technology for the development of nuclear reactor fuel element fabrication equipment, technology for the production of plutonium-239, technology for the production of enriched uranium, technology for the production of uranium-233.
3	P	gun mountings, components for gun mountings
4	P	sporting gun ammunition.
5	P	improvised explosive device detection equipment, components for improvised explosive device detection equipment.
6	P	military flying helmets, aircrew protective masks, components for aircrew protective masks, components for military flying helmets.
7	P	improvised explosive device jamming equipment
8	P	components for military search and rescue aircraft
9	P	command communications control and intelligence software
10	P	chemical agent detection equipment, components for chemical agent detection equipment, software for the use of chemical agent detection equipment, technology for the use of chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment.
11	P	military aircraft navigation equipment, components for military utility helicopters, software for the use of components for military utility helicopters, software for the use of military aircraft navigation equipment, technology for the use of components for military utility helicopters, technology for the use of military aircraft navigation equipment, test equipment for components for military utility helicopters, test equipment for military aircraft navigation equipment, components for military transport aircraft, software for the use of components for military transport aircraft, technology for the use of components for military transport aircraft, test equipment for components for military transport aircraft, components for military training

		aircraft, software for the use components for military training aircraft, technology for the use of components for military training aircraft, test equipment for components for military training aircraft, components for combat aircraft, software for the use of components for combat aircraft, technology for the use of components for combat aircraft, test equipment for components for combat aircraft, test equipment for the use of military aircraft airborne navigation equipment, components for combat helicopters, software for the use of components for combat helicopters, technology for the use of components for combat helicopters, test equipment for components for combat helicopters, test equipment for the use of military aircraft airborne navigation equipment, airborne navigation equipment, components for unmanned air vehicles, software for the use of components for unmanned air vehicles, software for the use of airborne navigation equipment, technology for the use of components for unmanned air vehicles, technology for the use of airborne navigation equipment, test equipment for components for unmanned air vehicles, test equipment for airborne navigation equipment, components for tanker aircraft, software for the use of components for tanker aircraft, software for the use of military aircraft navigation equipment, technology for the use of components for tanker aircraft, technology for the use of military aircraft navigation equipment, test equipment for components for tanker aircraft, components for military search and rescue aircraft, software for the use of components military search and rescue aircraft, technology for the use of components for military search and rescue aircraft, test equipment for components for military search and rescue aircraft, airborne navigation equipment, components for military surveillance aircraft, software for the use of components for military surveillance aircraft, software for the use of airborne navigation equipment, software for the use of military navigation equipment, technology for the use components for military surveillance aircraft, technology for the use of airborne navigation equipment, technology for the use of military aircraft navigation equipment, test equipment for components for military surveillance aircraft, test equipment for airborne navigation equipment.
12	P	shotguns, components for shotguns, air guns, components for air guns, weapon sights.

2	P	components for electronic countermeasures equipment, software for the use of electronic countermeasures equipment, test equipment for electronic countermeasures equipment.

## Philippines

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	Less than £100,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	1
Military List and other items	0
Total number of SIELs issued	2

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- components for large calibre artillery
- fibrous/filamentary materials

Number of SIELs refused covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
Total number of SIELs refused	1

Rating	ML1
No of SIELs covering items with this rating	1

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by reinstatement of this destination.		
No.	Type	Goods Summary
1	P	development equipment for equipment employing cryptography, software for the development of equipment employing cryptography, technology for the development of equipment employing cryptography, equipment employing cryptography.
2	P	equipment employing cryptography
3	P	aircraft bladders, aircraft diaphragms, aircraft seals, aircraft gaskets, aircraft valve seats, inertial equipment, components for inertial equipment.
4	T	naval navigation equipment

## Poland

STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 1.0m
---	--------

Number of SIELs issued covering:	
Items on the Military List	13
Other items	1
Military List and other items	0
Total number of SIELs issued	14

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- aircraft military communications equipment (2 licences)
- chemical agent detection equipment
- T chemical agent detection equipment
- components for ground vehicle military communications equipment

- components for heavy machine guns
- components for military communications equipment (2 licences)
- components for tanks
- ground vehicle military communications equipment
- gun mountings
- gun silencers
- heavy machine guns (11)
- military communications equipment
- military helmets
- military sonar detection equipment (2 licences)
- NBC respirators
- T night vision goggles
- products containing thorium
- technology for the use of military communications equipment
- weapon cleaning equipment
- weapon sights

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 1.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	17
Other items	1
Military List and other items	0
Total number of SIELs issued	18

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- T armoured all wheel drive vehicles
- components for military surveillance aircraft
- components for military training aircraft (2 licences)
- components for military transport aircraft (6 licences)
- components for naval light guns
- constituents of propellants
- deactivated mortars
- equipment for the use of weapon night sight
- T military utility helicopters

naval light guns  
 NBC clothing (2 licences)  
 pyrotechnics/fuels and related substances  
 rocket launching equipment  
 semi-automatic pistols (1)  
 sporting rifles (3)  
 technology for the use of naval light guns  
 weapon night sights  
 weapon sights

#### STANDARD INDIVIDUAL EXPORT LICENCES - INCORPORATION

Total value of SIEL applications for which a licence was issued	Less than £100,000
---	--------------------

Number of SIELs issued covering:	
Items on the Military List	1
Other items	0
Military List and other items	0
Total number of SIELs issued	1

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

components for military transport aircraft

#### OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by reinstatement of this destination.		
No.	Type	Goods Summary

No.	Type	Goods Summary
1	P	equipment employing cryptography
2	P	aircraft bladders, aircraft diaphragms, aircraft seals, aircraft gaskets, aircraft valve seats, inertial equipment, components for inertial equipment.

## United Arab Emirates

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 1.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	26
Other items	9
Military List and other items	1
Total number of SIELs issued	36

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- assault rifles (8)
- T automatic piloting systems for parachuted loads
- body armour
- chemicals used for cement and lime production
- civil body armour
- components for aerial target equipment
- components for airborne surveillance equipment
- components for body armour
- components for fire control equipment
- components for general purpose machine guns
- components for heavy machine guns
- components for military training aircraft (5 licences)
- components for sniper rifles
- components for sporting rifles
- components for submachine guns
- deuterium compounds
- equipment for the use of aerial target equipment
- flow measurement equipment
- gun mountings
- gun silencers
- microwave equipment
- military airborne cargo nets
- military field engineer equipment
- military helmets
- T night vision goggles
- semi-automatic pistols (10)
- shotguns (1)
- shotguns (13)
- shotguns (3)
- small arms ammunition (3 licences)
- sniper rifles (2)
- software for the development of equipment employing cryptography
- software for the use of equipment employing cryptography
- sporting gun ammunition (5 licences)
- sporting rifles (3)
- sporting rifles (4)
- sporting rifles (40)
- sporting rifles (6)
- submachine guns (6)
- submersible vehicles
- toxins
- training small arms ammunition
- T weapon day and night sights
- T weapon night sights (2 licences)
- T weapon sight mounts (2 licences)
- weapon sights (2 licences)
- T weapon sights

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by reinstatement of this destination.		
No.	Type	Goods Summary
1	T	submersible vehicles, submersible equipment, inertial equipment, marine position fixing equipment.
2	P	sporting gun ammunition
3	P	improvised explosive device detection equipment, components for improvised explosive device

		detection equipment.
4	P	components for ground based radars
5	P	command communications control and intelligence software
6	P	components for electronic countermeasures equipment, test equipment for electronic countermeasures equipment, test equipment for ground based radars, software for the use of electronic countermeasures equipment, software for the use of ground based radars, components for ground based radars.
7	P	general military vehicle components, technology for the use of general military vehicle components.
8	P	aircraft bladders, aircraft diaphragms, aircraft seals, aircraft gaskets, aircraft valve seats, inertial equipment, components for inertial equipment.
9	P	shotguns, rifles, sporting rifles, weapon sights, sporting gun ammunition, small arms ammunition.
10	P	military electronic equipment, components for military electronic equipment, sensor data recorders, military video recording equipment, military video processing equipment, components for sensor data recorders, components for military video recording equipment, components for military video processing equipment, software for the use of sensor data recorders, software for the use of military video recording equipment, software for the use of military video processing equipment, software for the use of military electronic equipment, technology for the use of sensor data recorders, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military electronic equipment,
11	P	equipment for the use of military aero engines, military aero engines, components for military aero-engines, military aircraft ground equipment, technology for the use of military aero-engines.
12	P	aircrew protective masks, anti-g/pressure suits, ejector seats, liquid oxygen converters, military aircraft pressurised breathing equipment, military flying helmets, components for airborne electronic warfare equipment, components for airborne navigation equipment, components for airborne refuelling equipment, components for airborne surveillance equipment, components for airborne targeting equipment, military aircraft flight data recorders, components for aircraft military communications equipment, general military aircraft components, components for military aircraft head-down displays, components for military aircraft head-up displays, components for military aircraft navigation equipment, components for combat aircraft, components for ejector seats, components for military aero-engines, components for military training aircraft, military aircraft ground equipment, military electronic equipment, components for military electronic equipment
13	P	body armour, components for body armour, bomb suits, military helmets, anti riot shields, ballistic shields.
14	T	naval navigation equipment.
15	P	components for military transport aircraft.

## United States of America

### STANDARD INDIVIDUAL EXPORT LICENCES

Total value of SIEL applications for which a licence was issued	£ 35.0m
---	---------

Number of SIELs issued covering:	
Items on the Military List	166
Other items	20
Military List and other items	3
Total number of SIELs issued	189

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- T aerial target equipment  
air guns (400)  
air guns (6)

air to surface missile handling equipment  
 animal pathogens (2 licences)  
 armoured fighting vehicles (2 licences)  
 armoured personnel carriers (3 licences)  
 armoured plate (3 licences)  
 attack alerting/warning equipment  
 T bomb suits (2 licences)  
 T chaff  
 chemical agent detection equipment (2 licences)  
 T chemical agent detection equipment  
 T civil NBC detection systems  
 T command communications control and intelligence software  
 command communications control and intelligence software (2 licences)  
 T components for aerial target equipment  
 components for air to surface missiles  
 T components for airborne radars  
 components for aircraft radars (3 licences)  
 components for armoured fighting vehicles  
 components for assault rifles (2 licences)  
 T components for bomb suits  
 components for combat aircraft (3 licences)  
 components for combat helicopters  
 components for ejector seats  
 components for electronic countermeasures equipment  
 components for general purpose machine guns (3 licences)  
 components for ground based radars (8 licences)  
 T components for ground based radars  
 T components for guided missile decoying equipment  
 components for heavy machine guns (2 licences)  
 components for helmet mounted display equipment  
 components for improvised explosive device detection equipment  
 components for laser weapon systems  
 components for military aero-engines (2 licences)  
 T components for military aero-engines  
 components for military aircraft head-down displays (2 licences)  
 components for military aircraft head-up displays (2 licences)  
 T components for military aircraft head-up displays  
 components for military aircraft navigation equipment  
 components for military communications equipment (4 licences)  
 components for military electronic equipment  
 components for military infrared/thermal imaging equipment (3 licences)  
 components for military search and rescue aircraft (3 licences)  
 components for military training aircraft (3 licences)  
 components for military transport aircraft (5 licences)  
 components for military utility aircraft  
 components for military utility helicopters (2 licences)  
 components for mine hunters  
 components for rifles  
 components for semi-automatic pistols (3 licences)  
 components for shotguns  
 components for small arms ammunition  
 components for sporting rifles (2 licences)  
 components for submachine guns (4 licences)  
 components for surface to air missiles  
 components for surface to surface missiles  
 components for surface to surface missiles launching equipment  
 components for tanks  
 components for test equipment for ground based radar  
 T components for unmanned air vehicles  
 components for unmanned air vehicles (3 licences)

- components for weapons simulators (2 licences)
- T decoy flares
- equipment employing cryptography
- equipment for the development of bombs
- T equipment for the use of aerial target equipment
- equipment for the use of military communications equipment (5 licences)
- equipment for the use of military distress signaling equipment
- extended temperature range integrated circuits (2 licences)
- T firing sets
- flash suppressors (2 licences)
- forgings for aircraft carriers
- forgings for components for aircraft carriers
- T guided missile decoying equipment
- gun mountings (4 licences)
- human pathogens
- improvised explosive device detection equipment (2 licences)
- T improvised explosive device disposal equipment (3 licences)
- T improvised explosive device jamming equipment (2 licences)
- T inertial equipment
- T integration software for inertial equipment
- T laser range finders
- mass spectrometers
- T military aero-engines
- military aero-engines
- military aircraft ground equipment
- military communications equipment
- military devices for initiating explosives
- military distress signalling equipment
- military electronic equipment (3 licences)
- T military engineer vehicles
- military helmets
- military improvised explosive device detection equipment
- military improvised explosive device jamming equipment
- T military parachutes
- military training aircraft
- military utility vehicles
- NBC clothing
- products containing thorium
- revolvers (1) (2 licences)
- rifles (1000)
- rifles (2)
- semi-automatic pistols (1)
- semi-automatic pistols (20)
- semi-automatic pistols (20000)
- shotguns (1) (11 licences)
- shotguns (2) (9 licences)
- shotguns (3) (2 licences)
- shotguns (4)
- shotguns (8)
- signature suppression coatings for military use
- software for the development of airborne radars
- T software for the simulation of military operation scenarios
- software for the use of airborne radars
- software for the use of improvised explosive device detection equipment
- software for the use of test equipment for military navigation equipment
- software to simulate the function of combat aircraft simulators
- software to simulate the function of military training aircraft simulators
- software for the use of military communications equipment
- sporting gun ammunition
- sporting gun ammunition

- sporting rifles (1) (4 licences)
- sporting rifles (13)
- sporting rifles (21)
- sporting rifles (25)
- sporting rifles (4)
- sporting rifles (9)
- tanks
- technology for the development of airborne radars
- technology for the use of airborne radars
- technology for the use of command communications control and intelligence software
- technology for the use of components for surface to surface missiles
- technology for the use of military communications equipment
- technology for the use of software to simulate the function of combat aircraft simulators
- technology for the use of software to simulate the function of military training aircraft simulators
- test equipment for bombs launching equipment
- test equipment for components for ground based radars
- test equipment for military aero-engines
- test models for the development of bombs
- test models for the development of components for military training aircraft
- T test models for the development of components for military training aircraft
- triggered spark gaps
- unfinished products for revolvers (5 licences)
- vintage guns (1)
- vintage guns (12)
- vintage military aircraft
- vintage military vehicles
- weapon cleaning kits
- T weapon night sights
- T weapon sight mounts
- weapon sights

STANDARD INDIVIDUAL EXPORT LICENCES - INCORPORATION

Total value of SIEL applications for which a licence was issued	£ 0.5m
---	--------

Number of SIELs issued covering:	
Items on the Military List	7
Other items	0
Military List and other items	0
Total number of SIELs issued	7

The SIELs issued were granted for the following items (for permanent export except where the entry is preceded by a T, which indicates a Temporary Export):

- components for armoured fighting vehicles
- components for military search and rescue aircraft
- forgings for military aero-engines
- production equipment for combat aircraft
- technology for the use of military communications equipment
- test models for the development of components for military training aircraft
- test models for the development of military training aircraft

OPEN INDIVIDUAL EXPORT LICENCES

Licences issued or where coverage was amended during the period by reinstatement of this destination.		
No.	Type	Goods Summary
1	P	sporting rifles, shotguns, weapon sights
2	P	NBC respirators, components for NBC respirators, NBC filters
3	P	components for military surveillance aircraft, equipment for the use of military surveillance aircraft , test equipment for military surveillance aircraft, components for combat aircraft.

4	P	components for instrumentation cameras
5	P	components for NBC respirators
6	P	military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment.
7	T	military electronic equipment, components for military electronic equipment, equipment for the use of military electronic equipment.
8	P	components for ground based radars.
9	P	general military aircraft components
10	P	sporting gun ammunition
11	P	castings for military aero-engines, forgings for military aero-engines, unfinished products for military aero-engines.
12	P	improvised explosive device detection equipment, components for improvised explosive device detection equipment.
13	P	military flying helmets, aircrew protective masks, components for aircrew protective masks, components for military flying helmets.
14	P	improvised explosive device jamming equipment.
15	P	components for military search and rescue aircraft
16	P	components for surface to surface missiles, technology for the development of components for surface to surface missiles.
17	P	command communications control and intelligence software
18	P	air guns.
19	P	sporting rifles, shotguns
20	P	general military vehicle components, technology for the use of general military vehicle components.
21	P	command communications control and intelligence software
22	P	chemical agent detection equipment, components for chemical agent detection equipment, software for the use of chemical agent detection equipment, technology for the use of chemical agent detection equipment, equipment for the use of chemical agent detection equipment, test equipment for chemical agent detection equipment.
23	P	components for body armour.
24	P	shotguns, rifles, sporting rifles, weapon sights, sporting gun ammunition, small arms ammunition.
25	P	technology for the development of air defence systems.
26	P	military electronic equipment, components for military electronic equipment, sensor data recorders, military video recording equipment, military video processing equipment, components for sensor data recorders, components for military video recording equipment, components for military video processing equipment, software for the use of sensor data recorders, software for the use of military video recording equipment, software for the use of military video processing equipment, software for the use of military electronic equipment, technology for the use of sensor data recorders, technology for the use of military video recording equipment, technology for the use of military video processing equipment, technology for the use of military electronic equipment
27	P	military aircraft navigation equipment, components for military utility helicopters, software for the use of components for military utility helicopters, software for the use of military aircraft navigation equipment, technology for the use of components for military utility helicopters, technology for the use of military aircraft navigation equipment, test equipment for components for military utility helicopters, test equipment for military aircraft navigation equipment, components for military transport aircraft, software for the use of components for military transport aircraft, technology for the use of components for military transport aircraft, test equipment for components for military transport aircraft, components for military training aircraft, software for the use components for military training aircraft, technology for the use of components for military training aircraft, test equipment for components for military training aircraft, components for combat aircraft, software for the use of components for combat aircraft, technology for the use of components for combat aircraft, test equipment for components for combat aircraft, test equipment for the use of military aircraft airborne navigation equipment, components for combat helicopters, software for the use of components for combat helicopters, technology for the use of components for combat helicopters, test equipment for components for combat helicopters, test equipment for the use of military aircraft airborne navigation equipment, airborne navigation equipment, components for unmanned air vehicles, software for the use of

		components for unmanned air vehicles, software for the use of airborne navigation equipment, technology for the use of components for unmanned air vehicles, technology for the use of airborne navigation equipment, test equipment for components for unmanned air vehicles, test equipment for airborne navigation equipment, components for tanker aircraft, software for the use of components for tanker aircraft, software for the use of military aircraft navigation equipment, technology for the use of components for tanker aircraft, technology for the use of military aircraft navigation equipment, test equipment for components for tanker aircraft, components for military search and rescue aircraft, software for the use of components military search and rescue aircraft, technology for the use of components for military search and rescue aircraft, test equipment for components for military search and rescue aircraft, airborne navigation equipment, components for military surveillance aircraft, software for the use of components for military surveillance aircraft, software for the use of airborne navigation equipment, software for the use of military navigation equipment, technology for the use of components for military surveillance aircraft, technology for the use of airborne navigation equipment, technology for the use of military aircraft navigation equipment, test equipment for components for military surveillance aircraft, test equipment for airborne navigation equipment.
28	P	equipment for the use of military aero engines, military aero-engines, components for military aero engines, military aircraft ground equipment, technology for the use of military aero-engines
29	P	body armour, components for body armour, bomb suits, military helmets, anti riot shields, ballistic shields.
30	P	airborne refuelling equipment, components for military aero-engines, components for military transport aircraft, components for military utility helicopters, equipment for the use of military transport aircraft, equipment for the use of military utility helicopters, general military aircraft components, aircraft military communications equipment, military aircraft navigation equipment, military aircraft ground equipment, military electronic equipment.
31	T	shotguns, sporting rifles
32	T	naval navigation equipment.
33	P	shotguns, components for shotguns, air guns, components for air guns, weapon sights.
Applications refused in full		
No.	Type	Ratings
