

Help Us Develop Natural England's Health Campaign

Obesity and physical inactivity cost the country £11b per year. Natural England will champion preventative health solutions in the natural environment. We have adopted an objective of providing accessible natural space within 300 metres (or 5 minutes walk) of every home in England for exercise, relaxation and wellbeing.

We are seeking help to identify the changes that need to be made to achieve this vision, and to find partners and mechanisms to help bring it about.

We wish to use this process to establish a coalition of partners in the public and voluntary, and health and environment sectors, to help take forwards our campaign for health and the natural environment locally, regionally and nationally.

Please contact us by email at: **health.campaign@naturalengland.org.uk** or via our website at www.naturalengland.org.uk where we will publish details of ways to participate in the development of this campaign.
