Our reference

Date *28.11.90*

Mr. F. A. H. Wells,

Pathology Dept,

CVL.

Dear Gerald,

As promised, here is the net frame from the suspect

hounds. Case references are as follows:-

SE. Number	Thirsk Ref No.	Histology result	SAF result
90/20 Starcross	M531/11	+ve	+ve
90/19 Starcross	M530/11	+ve	+ve
90/11 Carnetton	M583/11	+ve	N/A
90/8 Cambridge	M 449/11	-ve officially reassessed - ? +ve	+ve
<sup>101510</sup> 90/5 Langford	M 403/11	? inconclusive not reported yet	-ve
90/15 Newcastle		N/A	+ve

Case 90/15 Worcester - not yet received at Thirsk (two SAFs)

I will bring stained slides and wax blocks with me for Thursday.

Best wishes,

Robert Higgins, V10.

90/11.28/1.1

comment on blood slides from

1 more like water - myelinic oedema - looks not well defined

2 more water - myelinic oedema

3 exactly like seen already.

4 similar to some of granule/leucocytes + some but other one - very difficult to tell because could be

5 sticks like artefact.

6 can't interpret? reversed one.

7 prob water - myelinic oedema etc.

8 —

9 —

10 more of the same.

HA = Handwritten

HS = Hand survey

# Mad Dogz & Englishmen?

90 1514 <sup>obs</sup> - g. antheater neuropil van medlere raphe  
90/11 - nr. clear van neuropil? dorsal olive  
some neuropil van around connect

ant. med. - nr. clearly chromatolytic neuropil<sup>?</sup> ventral horn (? fascic)  
also scattered neuropil van eg. fascic & ventral groups.

90 1511 - obs - several soap bubble type fused neurons/processes + neuropil van around connect  
(90/8) med - scattered neuropil van cerebellar peduncle.

mid - neuropil van cerebral peduncle (+ swollen axons) + medullary lamina.

90 0150 obs - scattered neuropil van connect, medlere raphe, pyramids.  
med - scant " " cerebellar peduncle  
mid - " " " g. mid horn/sub nig/pyriformis-trunk.

90 1512 obs - widespread antheater neuropil van g. octa form, mid line raphe  
(90/19) + around connect = almost station spongiosa or deep neuropil/cerebels  
? scopie-like + pyramids + olive  
diagonal

med - widespread neuropil van esp white matter v. punched out-

mid - widespread + in cortex also  
+ clear van RN

.510.

0-1520

sp cord/muscles - neuropil was punched out 5+ w matter space.

disc - better exp around connect

rat nec - better exp around vestib group.

90-1519 - some neuropil was but poor brain condition.

90-1514 - some neuropil was exp around connect, vestib group - uncommon?

90-1513 - scattered neuropil was typical enter.

90-1512 - hand ataxia/scapula - like derm

90-1510 - typical scattered neuropil was.

Hand ataxia.
